of Correction**

Sir:

Pursuant to 35 U.S.C. § 254 and 37 C.F.R. § 1.322, this is a request for the issuance of a Certificate of Correction in the above-identified patent. Two (2) copies of PTO Form 1050 are appended. The complete Certificate of Correction involves 1 page.

The mistake identified in the appended Form occurred through no fault of the Applicant, as clearly disclosed by the records of the application, which matured into this patent. Enclosed for your convenience are the relevant parts to the Amendment filed October 9, 2006.

Issuance of the Certificate of Correction containing the correction is respectfully requested. Since this change is necessitated through no fault of the Applicant, no fee is believed to be associated with this request. Nonetheless, should the Patent and Trademark Office determine that a fee is required, please charge our Deposit Account No. 19-0733.

Respectfully submitted,

AMENDMENT

U.S. Patent and Trademark Office
Customer Window, Mail Stop Amendment
401 Dulany Street
Alexandria, VA 22314

Sir:

The present paper is responsive to the non-final Office Action mailed July 11, 2006 in the above-identified application, and is being filed during the shortened statutory period for responding to the Action, which is set to expire on October 11, 2006. Accordingly, no extension fees are believed to be due in connection with this filing. However, should any such fees be due, please charge such fees to Deposit Account No. 19-0733.

Please amend the instant application as follows:

Amendments to the Claims are reflected in the Listing of Claims, which begins on page 2 of this paper.

Remarks/Arguments begin on page 6 of this paper.

AUG 20 2007

Claim 38 (Previously Presented) The apparatus of claim 35, wherein said controller is configured to allow a user of said mobile communication apparatus to set a future incoming call handling operation for international roaming.

Claim 39 (New) The apparatus of claim 1, wherein said first information includes home country code identification information and home network code identification information for said apparatus; and said second information includes registered country code identification information and registered network code identification information for a network in which said apparatus is located.

Claim 40 (New) The apparatus of claim 39, wherein said table identifies at least one incoming call routing operation based on said home and registered country code identification information alone, without regard to said home and registered network code identification information.

Claim 41 (New) The apparatus of claim 1, further comprising a display, and a controller configured to display, on said display, an indication of a roaming status of said apparatus, and a message indicating how future incoming calls will be handled based on said roaming status.

Claim 42 (New) The apparatus of claim 41, wherein said message indicates a location to which future incoming calls will be routed.
